INSETS

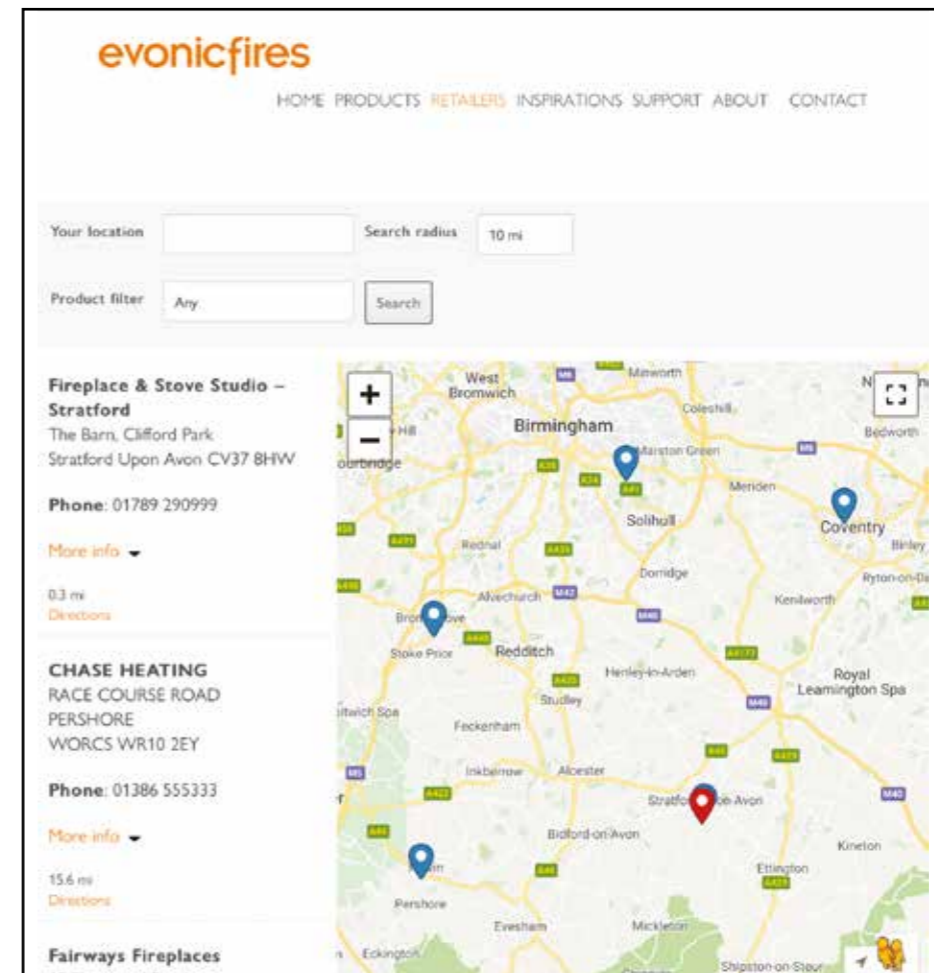

# WELCOME

Founded in 2005 and based in Stratford-upon-Avon, Evonic Fires occupy a 30,000 sq. ft manufacturing facility. Technological advancements and multi-award winning designs make Evonic Fires one of the leading manufacturers of electric fires in Europe. The Inset collection from Evonic Fires showcases our range of designs that will suit any living space. From contemporary style insets to traditional fireplaces, ideal for the more classic interior, the Evonic Fires insets range has a heating solution to suit any budget or style. The simplicity of our inset fires allows easy installation into your chosen location, all you need is a power source. Our insets range all come in at **75mm** deep, and comfortably fit a standard **16 x 22** inch opening. Each Evonic Inset model comes with a bespoke log or fuel set, tailored to perfectly compliment your flame effect.

# RETAILER NETWORK

With our huge network of dedicated retailers, it has never been easier to find the Evonic fire you are looking for. Our website features a detailed search engine to locate your nearest Evonic Fires stockist, and you can even narrow the search down to find particular ranges or models using our product filter tool.

## SIMPLE OPERATION

Our inset range offers a selection of three control options, so you can choose the preferred method to operate your new fire. We have recently introduced app control as an option throughout our inset range, meaning you can control every feature your fire has to offer using the Evonic e-touch app. For a more accessible control platform, you may wish to choose the Evonic handset; our easy to use remote that allows access to heat high, heat low, and brightness adjustment. Finally, we offer our inset range with the choice of a simple manual control panel which is located on the side of the case. This easy and stress free method of controlling your Evonic fire enables users to turn the fire ON or OFF and access thermostat settings.

## FEATURES

### BESPOKE FUEL BED & FUEL SET

Each Evonic Fires model comes complete with a bespoke fuel bed & fuel set, chosen specifically by our design team to enhance the aesthetic of your fire.

### FINISH OPTIONS

### LED TECHNOLOGY

By using the very latest LED lighting technology, Evonic Fires produce some of the most vibrant and realistic electric fires in the world.

**Please note:** Evonic Fires prides itself on constant development and innovation. We therefore reserve the right to alter the specification of any Evonic product without formal notice. The images in this brochure are produced using photography and CGI. Although the utmost care has been taken to accurately portray our products, we always advise a viewing in person at an approved Evonic Fires retailer's showroom.
